Catalog Description:	ReliaHome Flex Controller
Long Description:	The ReliaHome Flex Controller is a circuit-level control module that operates under the coordination of the ReliaHome Flex Hub. Each Controller monitors circuit-level electrical consumption and provides on/off control of connected branch circuits using latching relays for low standby energy consumption and dependable switching performance. Controllers communicate with the Hub over a wireless mesh network that does not rely on the home's Wi-Fi system. Designed for flexible installation anywhere along circuit wiring paths, the modules feature durable indoor/outdoor-rated enclosures for reliable operation in residential environments.
