Catalog Description:	ReliaHome Flex Hub
Long Description:	The ReliaHome Flex Hub is the central coordination and communication gateway of the ReliaHome Flex energy management system. The Hub connects to the internet via Ethernet but operates as a local-first device, maintaining full system functionality even without cloud connectivity. It establishes a secure, self-contained mesh network with paired ReliaHome Flex Controllers, independent of the home's Wi-Fi network. Designed for service upgrade avoidance and load optimization, the Hub provides reliable system coordination, secure data handling, and commissioning support through the ABB ReliaHome mobile app.
