*Requires a Watch Metering Kit for dynamic load management, sold separately. **Requires a Payment Terminal Plan.

basic

Free, fast deployment with essential monitoring for simple EV charging setups.

core

For single-site or small deployments. Set pricing, manage driver access, and balance power across chargers to avoid costly electrical upgrades.

plus

For multi-site and growing networks. Manage and monitor chargers across locations from one platform, optimize power with advanced load management, and maximize revenue (95% share).

OPTIONAL ADD-ONS

4G DATA PLANS: EVSE

Enables network connectivity for 4G-enabled charging stations in areas without reliable WiFi.

Required for stations that rely on cellular connections to communicate with the network.

Available for station with integrated 4G connectivity	Part #
1 Year - 4G Cellular Data Plan	EASCDP4GCTY
3 Year - 4G Cellular Data Plan	EASCDP4GC3Y

4G Cellular Data Plans for EVSE include 300MB of data per month.

PAYMENT TERMINAL PLANS

Required for stations equipped with internal or external payment/credit card readers. Covers the secure, encrypted processing of payment data and compliance with industry standards.

For stations with integrated payment terminals	Part #
3 Year - External Payment Terminal Subscription Plan	EAPTDP3Y
3 Year - Internal Payment Reader Subscription Plan	EAPTUN3Y

No apps, all taps. Eliminate the need for app based payments with an integrated payment terminal.
