

lyriQ Triple Source Input

F7428

Distributes three audio sources to multiple locations in the home. The lyriQ Triple Source Input and Four Source, Eight-Zone Distribution Module retrofit with existing lyriQ Audio components to expand a single source system into a multi-source system. Homeowners can choose the room and the audio source connected to what they want to hear — digital music, a CD, XM Satellite Radio and the tuner or stereo.

features & benefits

DISCONTINUED - SUPERSEDED BY [AU7428](#)

- Transmits audio via two Cat 5 cables that home run to the enclosure
- Integrated IR Target Input for local source control
- Minimal cabling eliminates messy wires that would otherwise clutter the entertainment center area
- Includes adjustable gain control for each source input
- Available July 2006
- Use with lyriQ Four Source, Eight-Zone Distribution Module
- Cat 5 backbone allows Whole House Commands - remote control of volume, on/off, mute and change source for all locations from one keypad volume control
